Schwaborn DSM 250

Fast, easy and ergonomically grinding of edges without being on your knees. A swiveling grinding head allows three working positions: Left-Right-Center. An individually adjustable dust shield ensures dust free grinding and low vibrations as well. Grinding and polishing of concrete, screed and stone floors, removal of glue and filler, leveling of uneven floors.

- Voltage : 220 Volt x 1
- Frequency : 60 Hz
- Motor : 2,2 kW
- ø-working width : 250mm
- Horsepower : 3 Hp
- Power CONSUMP : 16 Amp
- ø-grinding disc : 1 x 250mm
- Grinding pressure : 77lbs.
- Weight : 126lbs.
- Working to the edge : 0mm
- Tool speed : 1450 rpm
- ø-suction outlet : 50mm
- DIF - Diamond floating device
- MOP - Motor overload protection
- Tool turning direction : Reverse (CCW/R)
- Transport grip
- Dead man switch
- ETX - Easy tool exchange

Roll-A-Ramp® HD™

ROLL-A-RAMP® HD™ is an innovative portable ramp that can be used to get equipment and materials up or down a flight of stairs, into or out of a vehicle or over obstacles. Injuries can be avoided and time saved. The ramps roll up or can be folded for storage in small spaces where standard ramps won't fit. Custom lengths are available and longer ramps can be shortened quickly if needed. Sections can also be added to extend the ramp.

- Light weight
- Rolls down or folds for compact storage

HEPA
CERTIFIED VACUUM

Ermator® S26 HEPA Dust Extractor

As a business owner, it is important for you to protect your workers from this major occupational health hazard and begin establishing legal groundwork that will prevent future lawsuits. The first step is to stop your employees from using shop-style vacuums purchased from local home improvement stores and begin using professional HEPA Dust Extractors manufactured by Ermator. Unlike low cost homeowner vacuums, Ermator HEPA Dust Extractors are equipped with tested and certified HEPA filters that trap the smallest, most dangerous-to-breathe dust particles and prevents them from being released in the air. A HEPA Dust Extractor not only exhausts perfectly clean air, it is far more efficient for the fast recovery of bulk dry dust, debris and other building materials found on every construction, abatement and restoration job site. They can also be connected to electrical power tools to extract the freshly cut and friable concrete dust, considered to be the most hazardous to construction workers.

HEPA
CERTIFIED VACUUM

Ermator® S36 HEPA Dust Extractor

Introducing the most powerful single-phase HEPA Dust Extractor on the market today. Three large, commercial-grade vacuum motors provide over 350CFM and 110-inches of waterlift, plenty of power to handle any mid-size planetary floor grinder. Like all Ermator Dust Extractors, the model S36 is equipped with Jet Pulse filter cleaning, "drop-down" dust collection in a plastic bag and tested and certified HEPA filtration. What makes the S36 truly unique and unmatched in the concrete grinding and polishing industry is the quantity and size of its filters. It has a massive pre-filter with over 50-square feet of media, constructed in a cone-shape to reduce filter loading. The unique shape of the S36 pre-filter also improves filter cleaning, when necessary, via the Jet Pulse filter cleaning system. Our competitors have difficulty including a single HEPA filter with their vacuums. The S36 is equipped with three(3) independently tested and certified HEPA filters to guarantee that vacuum exhaust is absolutely dust-free! The S36 is also unmatched in its portability. Its surprisingly innovative dolly design makes loading and unloading a breeze. Once on the job site, this dust extractor easily navigates congested floor areas via a steel frame mounted on large rear wheels and lockable front swivel casters.

MOHS Hardness Kit for Materials Testing

Use this convenient and portable tool to perform a scratch test on materials to determine MOHS Hardness value. On this scale, which ranges from 1 to 10, Talc is softest at 1, while Diamond is hardest at 10.

The kit include 8 colour coded and stamped Hardness Points, equal to MOHS 2 through 9, each affixed to a handy pin vise for maximum control in No.5 point scratches the material, but the No.4 point does not, then the material's Hardness is between 4.0 and 5.0, or about 4.5.
