GRABO NEMO PORTABLE ELECTRIC VACUUM CUP

A new and revolutionary way to lift and handle tiles, Glass, concrete, dry walls, plywood furniture and much more. Designed for flooring professionals, Glass installers, carpenters, movers, construction workers, cuisiniste and more.

Nemo Power Tools builds quality premium tools which are built to last and get the job done every time. Each product is the result of years of great engineering, development and non-stop quality testing. Grabo is manufactured in-house in our privately owned and operated factory, where we control the full cycle of production and quality control. No third party contractors are used in the production, assembly, testing and packing of Grabo. Each Grabo is marked with a serial number and individually tested for pressure and strength before it is packed for delivery. In addition, several units of each production batch are tested until destruction in our own-site lab.

- Up to 375 lbs of holding force
