RED RIPPER ULTRALIGHT SUPER™ STONE ROUTER

A lightweight direct-drive router that behaves like stone routers twice its cost. At 2HP this router doesn't slow down when grinding like the regular Red Ripper Ultralight Stone Router! That said, it's not for polishing either: this is a pure edge shaping machine. It is built for profiling sinks and edges, and is perfect for pre-fabs.

Powered by the super strong and durable Makita GA7040S grinder, you'll have no problems shaping even larger edges.

The built-in hydroplaning base helps the router move smoothly over the surface of the stone without scratching. Works on both natural and engineered stone. While the router is light, it is no lightweight when it comes to the size of bits it can use - almost all standard 7/8 bore with M10-1.5 bolt router bits will fit and be usable, including all common 2, 3, and 4cm bits.

- Lightweight 22lbs, easy enough to lift with one hand!
- 8500 RPM at the bit (no load)

Included items:

Red Ripper Ultralight™ base, spindle, and water shield
Inline GFCI with 25ft cord and water-tight quick-disconnect
10ft Quick-disconnect water hose

*Makita GA7040S grinder sold separately
