OMNI CUBED® RIGID CROSS-BRACE KIT

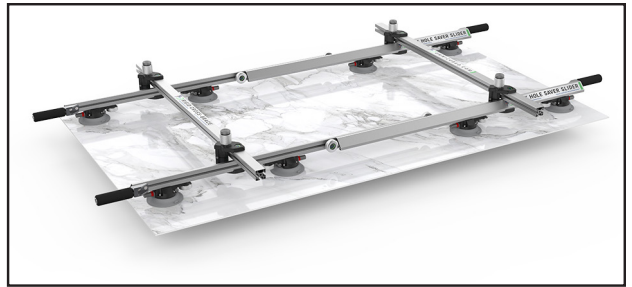

The Rigid Cross-Brace Kit connects any two vacuum cup Sink Hole Saver™ rails together to form a sturdy, non-flexing support frame around large cutouts and fragile materials. The frame can be configured to suite a variety of applications. The Rigid Cross-Brace Kit includes two 4' strengthening bars and four clamps. The optional Horizontal Lifting Handle accessory provides a gripping point beyond the ends of the bars.

Includes	Two 48" reinforcement bars, four cross-brace clamps, and carrying case
Product Dimensions	48" x 7" x 7"
Product Weight	18.0 lb
Package Dimensions	49" x 7" x 7"
Shipping Weight	18.5 lb
Materials	Anodized aluminum, aluminum, PVC, nylon, stainless steel, and zinc plated steel
Clamping Range	95 mm to 1175 mm (3 in. to 46 in.)
Rated Capacity	Refer to weight capacity of vacuum cups

Sink Hole Saver™ Horizontal Lifting Handle Kit
Material Handling

OMNI CUBED® SINK HOLE SAVER™ HORIZONTAL LIFTING HANDLE KIT

The Horizontal Lifting Handle Kit provides a comfortable gripping point beyond the ends of any vacuum cup Sink Hole Saver™ during lifting, moving, and tilting large format porcelain tiles or other materials. This accessory compliments the Rigid Cross-Brace Kit, which also pairs with our vacuum cup Sink Hole Savers.

Includes	Two end-mounted handles, mounting hardware, 5/32" hex key
Product Dimensions	8" x 3" x 2"
Product Weight	1.5 lb
Package Dimensions	8" x 3" x 2"
Shipping Weight	2.0 lb
Materials	Anodized aluminum, aluminum, stainless steel, zinc plated steel, EPDM closed-cell foam rubber grips
Rated Capacity	Refer to weight capacity of vacuum cups

OMNI CUBED® STEALTH GRIP™

The Stealth Grip™ is a non-marking vacuum cup that provides a reliable and convenient hand-hold on flat surfaces such as stone, tiles, and glass. Unlike natural black rubber vacuum cups, these are composed of a proprietary synthetic rubber that is not only non-marking, but also retains necessary durability such as UV, weather, and tear resistance. The cups also feature our FTS™ (Flexible Triple Seal) technology that locks-in vacuum and provides optimum hold, even on textured materials. The handle and thumb pump are made of unique plastic compound that is non-rusting and highly resistant to solvents (compared to metal or ABS handles used on other vacuum cups). Large red indicators on the thumb pumps allow monitoring vacuum pressure at a glance, and can be re-pumped in place without removal or loss of remaining pressure. Sold in pairs with a convenient storage bucket.

- Non-marking, proprietary synthetic* rubber cups are highly-durable and feature FTS™ technology for optimum hold, even on textured materials
- Handle and thumb pump are non-rusting and made of a unique plastic compound that is highly resistant to solvents
- Large 8" cups provide a reliable and convenient hand-hold on flat surfaces
- Easy-to-read indicators help monitor vacuum pressure at a glance
- Cups can be re-pumped in place, without removal or loss of remaining pressure
