

Gorilla Grip™ Seam Setter Installation Supplies

GranQuartz™
Canada Inc.

Gorilla Grip® Original Seam Setter

The Gorilla Grip allows seams to quickly open or close just by running the palm of your hand over the roller nut. This system provides speedy and powerful clamping with a minimum amount of effort. An electric vacuum pump is used to insure reliable, consistent and powerful clamping of the pods to the deck.

Also works well with slightly porous stones.

REPLACEMENT PARTS

We've included in this package the common replacement parts for the Gorilla Grip such as: most importantly the cams (sold in pack of 4), gasket set, jumper hoses, elbows for the hoses and a replacement case.

CAMS VS CAMLESS

Gorilla Grip is also available in a Camless version featuring eight convenient, built in, leveling points which allow you to get that perfect seam while giving you more space to access the seam.

Gorilla Grip® Seam Setter 2.1 (No Cams)

This improved version of the Gorilla Grip has all the same features and benefits of the original but with two very important upgrades. First, there are no longer cams to worry about. Four convenient, built in, leveling points now allow you to get that perfect seam giving you more space to access the seam. The second upgrade is 1/2" of additional space in between the pods. This along with the elimination of the cams allows the user to remove excess glue from the seam before it cures, saving time and money.

For those that still prefer the use of the cams (there are many of you still out there), we still offer the Original Gorilla Grip and replacement parts.
