Electric Center Water Feed Edition  
(Makita PW5001C)

Complete Kit - Seam Phantom®  
Electric Center Water Feed Edition  
Complete Kit

## Seam Phantom® Electric Center Water Feed Edition

NSI Solutions LLC is pleased to announce the addition of a new Seam Phantom® version to our line-up of proven stone fabrication tools. Beginning on March 1, 2019 a Seam Phantom® designed to fit the Makita PW5001C, center water feed, polisher will be available.

By mating the Seam Phantom® to the Makita PW5001C you get the benefit of center water feed which means better cooling and lubrication for the abrasives and less chance of dust. The Makita PW5001C also has built in GFCI protection and is specifically intended for use in a wet environment.

This new version of the Seam Phantom® uses the same, proven SL3 abrasives and the same accessories as the existing Seam Phantoms® and is made with the same quality materials and construction. It is sold in a complete kit which includes the new, upgraded, tool box as shown in the picture below. Like our original electric kit it can be converted to use an air polisher in the future if desired.

Stock No.	
790472	Seam Phantom® Center Water Feed Elec Pkg
